TITLE
Risk management — Guidelines

TITLE
1 Scope
PLAIN TEXT
This document provides guidelines on managing risk faced by organizations. The application of these guidelines can be customized to any organization and its context.
PLAIN TEXT
This document provides a common approach to managing any type of risk and is not industry or sector specific.
PLAIN TEXT
This document can be used throughout the life of the organization and can be applied to any activity, including decision-making at all levels.

TITLE
2 Normative references
PLAIN TEXT

TITLE
3 Terms and definitions
PLAIN TEXT
For the purposes of this document, the following terms and definitions apply.
PLAIN TEXT
ISO and IEC maintain terminological databases for use in standardization at the following addresses:
PLAIN TEXT
— ISO Online browsing platform: available at http://www.iso.org/obp
— IEC Electropedia: available at http://www.electropedia.org
PLAIN TEXT
3.1
risk
effect of uncertainty on objectives
PLAIN TEXT
Note 1 to entry: An effect is a deviation from the expected. It can be positive, negative or both, and can address, create or result in opportunities and threats.
PLAIN TEXT
Note 2 to entry: Objectives can have different aspects and categories, and can be applied at different levels.
PLAIN TEXT
Note 3 to entry: Risk is usually expressed in terms of *risk sources* (3.4), potential *events* (3.5), their *consequences* (3.6) and their *likelihood* (3.7).
PLAIN TEXT
3.2
risk management
coordinated activities to direct and control an organization with regard to *risk* (3.1)
TITLE
3.3
interested party
PLAIN TEXT
person or organization that can affect, be affected by, or perceive themselves to be affected by a decision or activity
PLAIN TEXT
Note 1 to entry: The term “interested party” can be used as an alternative to “stakeholder”.
PLAIN TEXT
3.4
risk source
element which alone or in combination has the potential to give rise to *risk* (3.1)

3.5

occurrence or change of a particular set of circumstances

Note 1 to entry: An event can have one or more occurrences, and can have several causes and several *consequences* (3.6).

Note 2 to entry: An event can also be something that is expected which does not happen, or something that is not expected which does happen.

Note 3 to entry: An event can be a risk source.

3.6

consequence

outcome of an *event* (3.5) affecting objectives

Note 1 to entry: A consequence can be certain or uncertain and can have positive or negative direct or indirect effects on objectives.

Note 2 to entry: Consequences can be expressed qualitatively or quantitatively.

Note 3 to entry: Any consequence can escalate through cascading and cumulative effects

3.7

likelihood

chance of something happening

Note 1 to entry: In *risk management* (3.2) terminology, the word "likelihood" is used to refer to the chance of something happening, whether defined, measured or determined objectively or subjectively, qualitatively or quantitatively, and described using general terms or mathematically (such as a probability or a frequency over a given time period).

Note 2 to entry: The English term "likelihood" does not have a direct equivalent in some languages; instead, the equivalent of the term "probability" is often used. However, in English, "probability" is often narrowly interpreted as a mathematical term. Therefore, in risk management terminology, "likelihood" is used with the intent that it should have the same broad interpretation as the term "probability" has in many languages other than English.

3.8

measure that maintains and/or modifies *risk* (3.1)

Note 1 to entry: Controls include, but are not limited to, any process, policy, device, practice, or other conditions and/or actions which maintain and/or modify risk.

Note 2 to entry: Controls may not always exert the intended or assumed modifying effect.

4 Principles

The purpose of risk management is the creation and protection of value. It improves performance, encourages innovation and supports the achievement of objectives.

The principles outlined in Figure 2 provide guidance on the characteristics of effective and efficient risk management, communicating its value and explaining its intention and purpose. The principles are the foundation for managing risk and should be considered when establishing the organization's risk management framework and processes. These principles should enable an organization to manage the effects of uncertainty on its objectives.
